

ASTERIA — Complete Asset Prompt Sheet

The AI Science Explorer • Full production list

HOW TO USE THIS SHEET

Two kinds of prompts. **They are not interchangeable.**

	Tool	Purpose	Rule
IMAGE	Nano Banana / Midjourney	Concept art, pitch deck, UI backgrounds, marketing	Backgrounds allowed, scenes allowed
3D	Meshy / Tripo / Rodin	Actual game models	Single object only. No scenes. No backgrounds.

The #1 mistake: feeding an IMAGE prompt into a 3D tool. “Room with machines and windows” becomes one unrecognisable blob. Rooms are built in the engine from 6–8 modular pieces.

STYLE LOCK — paste at the end of EVERY prompt

For IMAGE prompts

clean minimal sci-fi design language, Monument Valley geometric restraint,
matte surfaces, large calm empty areas with one dense detail cluster,
navy / white / cyan / warm gold palette, soft cinematic lighting,
no text, no logos, no watermark. 16:9, ultra sharp, high detail.

For 3D prompts

stylized low poly, flat shading, matte surfaces, navy / white / cyan /
warm gold palette, clean geometric forms, single object, centered,
plain background, game ready, GLB.

NEGATIVE prompt (both)

text, logo, watermark, signature, cluttered, busy, photorealistic, gritty, rusty, weapons, lens dirt, distorted anatomy, extra limbs, multiple objects

DO NOT WRITE

Unreal Engine style · 8K octane render · environment (in 3D prompts) · no characters (negative words belong in the negative field, not the prompt)

SHIP DESIGN SPEC — paste into every ship-related prompt

SHIP: white ceramic layered hull plates with navy trim, one glowing cyan seam line running the full length of the spine, wide curved glass observation dome at the bow, two swept-back engine nacelles trailing soft cyan ion glow, a thin sensor mast on one side only (asymmetric), no weapons.

That single cyan spine line is the ship’s identity. Every shot shows part of it, so every shot reads as the same ship.

CHAPTER COLOUR LOGIC

Chapter	Palette	Feeling
1 — Ship	White + cyan on navy	Cold, precise, mechanical
2 — Planet	Deep teal + mint green	Organic, alive, subtly wrong
3 — Core	Black + warm gold	Ancient, sacred, monumental

Cold → living → gold. Three chapters readable at a glance.

SECTION 0 · THE SHIP

0-1 Ship hero shot (KEY VISUAL — do this first)

IMAGE

Hero shot of a futuristic exploration spaceship gliding through deep space. Elongated white ceramic hull with navy panel seams and a glowing cyan light strip running along its spine. Wide curved observation dome at the bow, two swept-back engine nacelles trailing soft cyan ion glow. A massive rust-orange ringed planet fills the lower right, its dust ring catching rim light. A small pale blue moon far behind. Dense starfield, faint violet and teal nebula. Cinematic three-quarter view from slightly below, dramatic rim lighting from a distant white sun. (IMAGE LOCK)

3D

Futuristic exploration spaceship, elongated streamlined hull, wide curved observation dome at the bow, two swept-back engine nacelles at the rear, layered white ceramic panels with navy trim, glowing cyan seam lines along the spine, three landing struts folded underneath, asymmetric sensor mast on one side, no weapons, research vessel silhouette. (3D LOCK)

0-2 Ship in low orbit (scale shot)

IMAGE

A sleek white exploration spaceship in low orbit, small against an enormous planet filling the entire frame behind it. The planet surface below shows glowing teal vegetation in geometric valleys, atmospheric haze at the curved horizon. The ship's cyan engine glow reflects on its white hull. Wide establishing shot, the ship tiny and precise against vast scale. (SHIP SPEC)(IMAGE LOCK)

3D — same model as 0-1, no new asset needed.

0-3 Ship front-on (cover / logo backdrop)

IMAGE

Front-on symmetrical view of a futuristic research spaceship approaching camera, wide curved glass observation dome glowing warm from inside, two cyan engine cones flaring on either side, layered white panel plating, a glowing seam line forming a subtle vertical spine. Deep space behind, a ringed planet as a soft silhouette. Perfectly centered, strong symmetry. (SHIP SPEC)(IMAGE LOCK)

SECTION 1 · CHAPTER 1 — THE LOST KNOWLEDGE

Physics & Engineering · White + cyan on navy

1-1 Observation deck, planet through the window (MAIN VISUAL)

IMAGE

First-person view standing inside a spaceship observation deck. Curved white ceramic hull ribs arc around the edges of the frame, a glowing cyan seam line tracing the ceiling beam overhead. Through a vast panoramic curved window, an enormous rust-orange ringed planet fills two thirds of the view, its dust ring cutting diagonally across the glass. A smaller pale blue moon far behind. The Milky Way band stretches across the black sky in violet and teal. Faint reflections of interior lights on the glass. Backlit interior, silhouetted railing in the foreground. (IMAGE LOCK)

1-2 Engine room interior (CHAPTER 1 CORE SCENE)

IMAGE

Interior of a futuristic spaceship engine room. A tall hexagonal crystal reactor column stands at the centre in a dark metal cradle, three concentric rings floating around it, glowing cyan from within. White ceramic wall panels with recessed glowing strips, dark navy hexagonal deck plates, thick conduit pipes running along the walls. Cool blue light, deep shadows, one warm gold accent light on the far side. Wide interior view, symmetrical, calm and empty. (IMAGE LOCK)

3D — build this room from 6 modular pieces:

#	Piece	3D Prompt
A	Wall panel	Modular spaceship wall panel, single flat rectangular segment with a recessed horizontal glowing cyan strip, white ceramic face with navy edge frame, tileable left and right. (3D LOCK)
B	Floor tile	Modular spaceship floor tile, square deck plate with a hexagonal inset pattern, dark navy metal with thin cyan inlay lines, tileable on all four edges. (3D LOCK)

C	Door frame	Futuristic sliding door frame, tall rectangular archway with a glowing cyan threshold light along the base, white ceramic with a dark inner recess. {3D LOCK}
D	Conduit pipe	Modular conduit pipe segment, white ceramic tube with a glowing cyan channel running along its length, straight section with connector ends, tileable. {3D LOCK}
E	Ceiling beam	Modular spaceship ceiling beam, long rectangular structural beam with a continuous glowing cyan light strip on its underside, white ceramic with navy trim, tileable ends. {3D LOCK}
F	Reactor core	Vertical reactor core, tall hexagonal crystal column standing in a dark metal cradle, glowing inner light, three separate floating concentric rings around it. {3D LOCK}

These 6 pieces build all four ship rooms. Do not generate rooms.

1-3 Command bridge

IMAGE

Interior of a spaceship command bridge seen from behind the pilot seats. Curved white console banks with glowing cyan touch panels sweep across the foreground. Beyond them, a wide curved observation dome opens onto deep space: three planets at different distances — a close rust-orange ringed world, a mid-distance blue-green one, a tiny white dot far away. The Milky Way arcs overhead through the dome glass. Cool blue interior light, one warm gold accent console. Symmetrical, cinematic. {IMAGE LOCK}

1-4 Science lab (materials testing)

IMAGE

Interior of a futuristic spaceship science laboratory. A long white ceramic workbench with four small pedestals, each holding a different glowing material sample — copper orange, silver white, pale blue glass, matte black. A transparent cylindrical reaction chamber glows violet at one end of the bench. Floating holographic molecular diagrams in thin cyan lines above. Clean, bright, clinical. {IMAGE LOCK}

1-5 Airlock — the moment of arrival

IMAGE

View from inside a spaceship airlock as the door slides open. A white ceramic door frame with a glowing cyan threshold light forms a rectangle in the foreground, dark interior on this side. Through the opening: the ship's forward hull curving away, and beyond it an enormous ringed planet with the galaxy band blazing behind it. Strong contrast between the dark interior and the bright cosmic view. (SHIP SPEC)(IMAGE LOCK)

SECTION 2 · CHAPTER 2 — THE PLANET'S SECRET

Chemistry & Biology · Deep teal + mint green

2-1 Descent into the atmosphere

IMAGE

A white ceramic exploration spaceship descending through the upper atmosphere of an alien planet, thin heat glow along its leading edges, glowing cyan spine seam visible along the hull. Below, vast dark teal valleys threaded with glowing mint-green vegetation arranged in unnaturally geometric patterns — clearly engineered, not natural. Thin clouds catching low gold sunlight. Wide shot from above and behind the ship. (SHIP SPEC)(IMAGE LOCK)

2-2 Planet surface panorama (CHAPTER 2 KEY VISUAL)

IMAGE

Alien planet surface at dusk. Rolling dark teal terrain covered in bioluminescent mint-green plants growing in perfect hexagonal cells, the pattern stretching to the horizon like circuitry. Tall thin white sci-fi pylons stand at each cell junction, connected by faint glowing cyan energy lines running along the ground. A large ringed planet hangs low in the deep blue sky. Soft volumetric mist. Beautiful but subtly artificial. (IMAGE LOCK)

2-3 The three ecosystem pylons (CORE GAMEPLAY SCENE)

IMAGE

Three tall white ceramic pylons standing in a shallow valley of glowing alien vegetation, each topped with a floating orb — one warm gold, one cyan, one violet — casting coloured light onto the plants below. Thin holographic gauge rings float around each orb. Plants near the gold pylon are bright and healthy; plants further away are dim and shrivelled. Low angle, dusk lighting, quiet and slightly wrong. [IMAGE LOCK]

3D

Tall sci-fi control pylon, slender white ceramic shaft on a hexagonal base, a floating glowing orb suspended above the top with a small gap, thin ring around the orb, minimal geometric design. [3D LOCK] *(Generate once, recolour the orb in-engine for the three variants.)*

2-4 Bioluminescent plants (biology close-up)

IMAGE

Close-up of alien bioluminescent plants. Smooth translucent mint-green stems with visible glowing veins carrying light down into the soil, faceted geometric leaf caps, tiny drifting spores of light around them. Behind, out of focus, a white sci-fi pylon and a huge ringed planet in the sky. Shallow depth of field, macro detail, magical and organic. [IMAGE LOCK]

3D — 3 variants:

Stylized alien plant, single smooth curved stem with a faceted translucent mint-green cap, glowing veins visible under the surface, bioluminescent. [3D LOCK] Alien mushroom cluster, three rounded translucent caps of different heights on short thick stems, glowing mint-green underside gills. [3D LOCK] Tall alien grass tuft, cluster of thin upright blades curving outward, translucent teal with glowing tips. [3D LOCK]

2-5 Field laboratory (chemistry)

IMAGE

An open-air field laboratory on an alien planet. A white curved workbench with transparent sample chambers holding glowing soil, plant tissue and mineral fragments, each lit from below in a different colour. Floating holographic molecular diagrams in thin

cyan lines above the bench. A small round white and violet laboratory robot hovers beside it. Glowing vegetation and a ringed planet in the background at dusk. (IMAGE LOCK)

3D

Futuristic field workbench, single curved white ceramic table segment on four slim legs, three transparent cylindrical sample chambers set into the top surface, glowing base rings, modular tileable ends. (3D LOCK)

2-6 The machine beneath the surface (the reveal)

IMAGE

A hidden underground chamber beneath an alien planet's surface. Enormous ancient machinery of white ceramic and dark metal stretches into darkness, thick conduits rising up into the soil above and connecting directly to the roots of glowing plants. Some conduits are dark and cracked. Faint cyan light pulses along the working ones. Cathedral scale. Awe and unease. (IMAGE LOCK)

2-7 The ecosystem restored (success moment)

IMAGE

Wide shot of an alien valley coming back to life. A wave of bright mint-green bioluminescence spreading outward across hexagonal fields of plants, three white pylons at the centre now glowing steadily gold, cyan and violet. Light rising from the vegetation into the air as drifting spores. A small figure in a white and coral spacesuit stands watching, tiny against the landscape. Ringed planet in the dusk sky. Triumphant, warm, quiet. (IMAGE LOCK)

SECTION 3 · CHAPTER 3 — THE FINAL MEMORY

AI & Human Knowledge · Black + warm gold

3-1 Entrance to the Core

IMAGE

A monumental doorway carved into an alien cliff face, a tall pointed arch of dark stone inlaid with glowing gold circuit patterns. Beyond the threshold, only warm gold light and darkness. Glowing vegetation grows right up to the entrance but stops at the line. A small figure in a white and coral spacesuit stands at the base, dwarfed by the scale. Dusk, low mist. Sacred and forbidding. {IMAGE LOCK}

3D

Ancient stone doorway arch, tall pointed archway of dark faceted stone with glowing gold circuit patterns inlaid across the surface, chipped edges, single freestanding structure. {3D LOCK}

3-2 Memory Core chamber (CHAPTER 3 KEY VISUAL)

IMAGE

Interior of an ancient alien memory chamber. A tall black obelisk at the centre etched with glowing gold circuit patterns, three enormous gold rings floating around it at different heights and angles. Eight-sided dark chamber walls with thin vertical gold light strips. Crystalline shards drift weightlessly in the air. Deep shadow, a single warm gold light source, everything else falling into black. Symmetrical wide shot, monumental. {IMAGE LOCK}

3D

Ancient data monolith, tall black obelisk with glowing gold circuit patterns etched across all faces, tapering slightly toward the top, standing on a hexagonal base, three separate floating rings around it. {3D LOCK}

3-3 The Science Core speaks

IMAGE

A colossal holographic face materialising in a dark chamber, its features fragmented into floating crystalline geometric planes, semi-transparent glowing gold wireframe, calm and expressionless. Shards orbit slowly around where a head would be. Far below, a tiny figure in a white spacesuit looks up. Extreme scale contrast, gold on black, reverent and slightly sad. {IMAGE LOCK}

3D

Giant holographic face sculpture, fragmented crystalline geometric facial planes, calm expressionless features, semi-transparent gold wireframe surface, floating shard fragments separated from the main form. (3D LOCK)

3-4 Holograms of the lost civilisation

IMAGE

A holographic memory playing inside a dark chamber. Ghostly translucent gold figures of an ancient civilisation frozen mid-gesture — scientists at work, a child pointing upward, hands passing an object between them. The holograms are incomplete, breaking into geometric fragments at the edges. Deep black surroundings, only the gold light of the memory. Melancholy, like a fading photograph. (IMAGE LOCK)

3-5 The knowledge network

IMAGE

An enormous three-dimensional network of glowing gold nodes and thin connecting lines filling a dark chamber, forming a vast sphere of light. Some nodes are bright, others dark and dead. A small figure in a white and coral spacesuit stands at the base reaching toward one dim node, which is beginning to glow again. Extreme scale, gold on black, hopeful. (IMAGE LOCK)

3-6 The Core restored (FINALE)

IMAGE

The moment an ancient memory core comes back online. A black obelisk blazing with gold circuit light, its three floating rings spinning into alignment, waves of gold light rushing outward along the chamber walls and up through the ceiling. A small figure in a white and coral spacesuit stands with one hand raised, silhouetted against the light. Everything bright, warm, overwhelming. Triumphant finale. (IMAGE LOCK)

3-7 Epilogue — the next explorer

IMAGE

A small figure in a white and coral spacesuit standing at the bow observation window of a spaceship, seen from behind in silhouette. Outside, the alien planet now glows warm gold and mint green across its whole surface, restored, with the Milky Way band arcing above it. White curved hull ribs frame the view, cyan seam lights tracing them. Quiet, hopeful — an ending that is also a beginning. {SHIP SPEC}{IMAGE LOCK}

SECTION 4 · AVATARS

Silhouettes must differ. Players identify characters by shape at 30 metres, not by face. Rounded human / legless cone / broad box / floating sphere / giant face.

4-0 Character lineup (marketing image)

IMAGE

Character lineup of four sci-fi game characters standing side by side on a plain dark navy background. Left to right: a young explorer in a white and coral lightweight spacesuit with a glowing orange visor; a translucent cyan holographic AI figure with no legs, floating; a broad-shouldered veteran captain in a dark navy suit with gold shoulder trim, grey beard, no helmet; a small round white and violet laboratory robot with big glowing eyes, hovering. Full body, even lighting, clearly separated silhouettes. {IMAGE LOCK}

4-1 NOVA — player character

IMAGE

Full body character portrait of a young space explorer in a white and coral lightweight spacesuit, rounded helmet with a glowing orange visor, cyan backpack unit, standing confidently. Plain dark navy background, even studio lighting, three-quarter view. {IMAGE LOCK}

3D

Young space explorer character, slim white and coral lightweight spacesuit, rounded helmet with a transparent glowing orange visor, cyan backpack unit, friendly proportions, T-pose, arms out to the sides. {3D LOCK}

4-2 AURA — ship intelligence

IMAGE

Full body portrait of a holographic AI assistant: a semi-transparent glowing cyan humanoid figure tapering to a cone with no legs, floating above a glowing ring, smooth featureless face with two soft light points for eyes. Plain dark navy background, rim lighting. (IMAGE LOCK)

3D

Holographic AI assistant figure, semi-transparent glowing cyan humanoid body tapering to a smooth cone with no legs, smooth featureless head with two small light points for eyes, a separate flat ring beneath the figure, elegant and minimal. (3D LOCK)

4-3 CAPTAIN ORION — science officer

IMAGE

Full body portrait of a veteran space captain scientist: broad shoulders, dark navy advanced suit with gold shoulder trim, no helmet, weathered confident face, short grey beard, a glowing holographic band on his forearm. Plain dark navy background, warm key light. (IMAGE LOCK)

3D

Veteran space captain scientist character, broad boxy torso in a dark navy suit with gold shoulder trim, no helmet, short grey beard, a glowing band on one forearm, sturdy stance, T-pose. (3D LOCK)

4-4 LUNA — lab robot

IMAGE

Full body portrait of a small round laboratory robot: spherical white and violet body, large expressive glowing eyes on a flat screen face, two short articulated arms holding a beaker, hovering with no legs. Plain dark navy background, soft even lighting, cheerful. (IMAGE LOCK)

3D

Small round laboratory robot, spherical white and violet body, flat screen face with two

large glowing eyes, two short articulated arms, hovering with no legs, cartoon proportions. {3D LOCK}

4-5 SCIENCE CORE — memory system

See 3-3 above for both prompts.

SECTION 5 · INTERACTIVE ELEMENTS

Everything the player picks up, tests, or operates.

Chapter 1 — Physics & Engineering

Element	3D Prompt
Material sample pedestal	Small sci-fi display pedestal, cylindrical white ceramic base with a glowing ring inset near the top, flat display surface, single object. {3D LOCK}
Copper sample	Small raw metal sample, faceted irregular chunk of warm orange copper, polished flat facets, single object. {3D LOCK}
Aluminium sample	Small raw metal sample, faceted irregular chunk of pale silver-white aluminium, matte flat facets, single object. {3D LOCK}
Glass sample	Small material sample, faceted chunk of pale blue translucent glass, sharp clean facets, single object. {3D LOCK}
Rubber sample	Small material sample, rounded lump of matte black rubber, soft irregular form, non-reflective, single object. {3D LOCK}
Conductivity tester	Sci-fi laboratory test rig, white ceramic base with two upright electrode posts and a spherical indicator lamp on a slim stalk between them, single object. {3D LOCK}
Bus bar (quest item)	Metal conductor bar, long rectangular aluminium bar with rounded ends and two bolt holes, brushed silver finish, single object. {3D LOCK}

Energy crystal	Glowing energy crystal, sharp angular faceted transparent crystal with a bright glowing core, floating artifact, single object. {3D LOCK}
-----------------------	---

Chapter 2 — Chemistry & Biology

Element	3D Prompt
Sample container	Sci-fi sample container, small transparent cylinder in a white ceramic frame with a glowing base ring and a carry handle on top, single object. {3D LOCK}
Soil core sample	Cylindrical soil core sample in a clear tube, layered dark teal and brown strata visible through the glass, single object. {3D LOCK}
Bauxite / ore rock	Rough ore rock, irregular faceted chunk of red-brown mineral with lighter mottled patches, matte surface, single object. {3D LOCK}
Reaction chamber	Laboratory reaction chamber, transparent glass cylinder on a white metal base with a glowing base ring and a sealed cap, single object. {3D LOCK}
Root conduit	Ancient machine conduit, thick white ceramic pipe with a glowing cyan channel, one end flared and branching into three root-like tendrils, single object. {3D LOCK}
Spore particle	Tiny glowing seed pod, small rounded translucent capsule with a bright mint-green core and soft outer fuzz, floating, single object. {3D LOCK}

Chapter 3 — AI & Knowledge

Element	3D Prompt
Memory shard	Floating memory shard artifact, angular crystal fragment with a glowing gold core, ancient patterns engraved on the surface, single object. {3D LOCK}
Knowledge node	Glowing sphere node, small faceted gold orb inside a thin open geometric cage, radiating soft light, single object. {3D LOCK}

Core key	Ancient key artifact, flat geometric gold plate with a hexagonal cut-out centre and etched circuit patterns, single object. (3D LOCK)
Floating shard debris	Small crystalline debris fragment, sharp angular dark stone shard with thin glowing gold edge lines, single object. (3D LOCK)

SECTION 6 · NAVIGATION & UI

⚠ Most of this should NOT be generated

Navigation is code and CSS, not models. Generating it wastes budget and looks worse.

Element	How to build
Waypoint diamond	<code>OctahedronGeometry(0.6)</code> + emissive material + Y-rotation + vertical bob
Target ring on floor	<code>RingGeometry(1.1, 1.35)</code> + transparent BasicMaterial + pulsing opacity
Floor guide strip	Thin emissive box from player toward target, bending at corners
Off-screen arrow	CSS chevron pinned to screen edge when target is outside the view frustum
Interaction prompt	HTML overlay: [E] Talk to AURA
Objective panel	HTML overlay, top-left
Inventory slots	HTML overlay, top-right
Starfield	<code>THREE.Points</code> , 2400 particles, one draw call — never a 3D model
Sun	<code>DirectionalLight</code> + additive sprite + halo sprite — never a 3D model

Worth generating (2 items only)

Star chart table

Holographic star map table, circular white ceramic pedestal with a glowing emitter ring set into the top surface, minimal sci-fi navigation console, single object. {3D LOCK}

Mission console

Curved control console, single segment with a 30-degree angled top panel, white ceramic body with a glowing cyan touch surface, modular tileable ends. {3D LOCK}

UI background plate (image)

IMAGE

Abstract sci-fi user interface background plate. Deep navy field with a subtle hexagonal grid, thin glowing cyan corner brackets, faint horizontal scan lines, a soft radial glow in the centre. Completely empty in the middle for text overlay. Flat, clean, no objects. 16:9. (IMAGE LOCK, minus "high detail")

TECHNICAL SPEC FOR 3D ASSETS

Lock these before generating or you will redo everything.

Setting	Value
Format	GLB (single file, textures embedded)
Poly budget	Characters ≤ 8k tris · props ≤ 2k · modular pieces ≤ 1k
Facing	Characters face +Z, Y-up
Pivot	Characters: at the feet · Props: geometric centre · Modular: at the join face
Scale	1 unit = 1 metre. Characters 1.8 units tall. Set this on every asset.
Pose	T-pose or A-pose for anything to be rigged
Texture	1024×1024 max, single material per object
Naming	chapter_type_name_v01.glb — e.g. ch1_prop_busbar_v01.glb

PRIORITY ORDER

Time is short. Generate in this sequence.

Tier 1 — pitch deck (5 images)

1. **0-1** ship hero shot
2. **1-1** observation deck with planet
3. **2-2** planet surface panorama
4. **3-2** memory core chamber
5. **4-0** character lineup

Tier 2 — playable demo (10 models)

6. Four avatars (**4-1** to **4-4**)
7. Six ship modular pieces (**1-2** A–F)

Tier 3 — gameplay props (8 models)

8. Four material samples + tester + bus bar (Chapter 1)
9. Pylon + three plant variants (Chapter 2)

Tier 4 — everything else

10. Remaining scene images, Chapter 3 props, extra environment pieces

Skip entirely: stars, sun, all navigation UI, floor markers, waypoints. Those are code.

ONE-LINE BRIEF FOR YOUR TEAMMATE

Every prompt below ends with a STYLE LOCK block — always paste it. Never feed an IMAGE prompt into a 3D tool. Rooms are never generated; they are built in the engine from the modular pieces listed. Set the negative prompt once and leave it on.
